RHODIUS

GRINDING TOOLS FOR PRIVATE LABELS

WE ARE THE EXPERTS

We attract customers worldwide with tailor-made private label solutions.

The demand from our clients for high-performance and economical quality tools, for cutting discs, grinding discs, flap discs, diamond cutting discs at the best possible price, is what drives us. Our R&D department helps develop products to meet the specific needs of your markets and applications. We are fully compliant with all the requirements of international and national standards, quality guidelines and legislation. We are also a founding member of oSa® (Organization for the Safety of Abrasives).

With RHODIUS, you benefit from over 60 years of experience and the know-how of a leading and innovative grinding tool manufacturer.

RHODIUS – THE DEFINITION OF PERFORMANCE

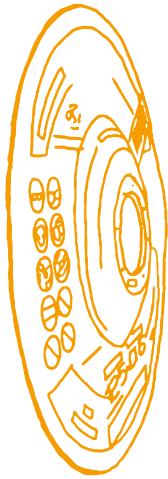

At our production site in Germany with a strong R&D department behind us, we manufacture innovative and tailor-made grinding tools exactly according to customers needs.

The total capacity of our sites is currently close to 120 million discs per year. With all the knowledge of our branches in Europe, America and Asia we can support you in a perfect manner.

QUALITY FROM A SINGLE SOURCE

Extra-thin cutting discs, stationary cutting discs, freehand cutting discs, flap discs, grinding discs, diamond cutting discs – from standard quality to highly innovative products, we offer a comprehensive and convincing product range.

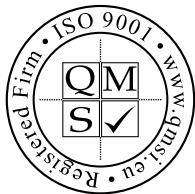

We supply abrasives of the highest quality, tested and with all the necessary certificates – across all our quality lines: basic, good, better, and best.

RHODIUS grinding tools for private labels are manufactured in accordance with European standards and oSa® guidelines at both sites.

SERVICE+

- Know-how of the specialist for extra-thin cutting discs
- Choose from a wide range of products for total flexibility in building your own portfolio
- 4 quality lines for different requirements
- Highest safety standards thanks to the compliance with European standards and oSa® guidelines

OS[®]

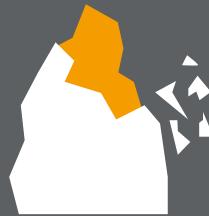

TECHNOLOGIES

FOR EVEN MORE PERFORMANCE

For even more cuts

Advanced cutting discs have a 30 % longer service life thanks to a new, optimised manufacturing process.

For aggressive stock removal and high cutting speed

Cutting, grinding and flap discs with high-performance ceramic abrasive grain deliver significant time and cost savings.

For maximum precision

Never-seen-before extra-thin cutting discs (0.6 mm) for precise, almost entirely burr-free and extremely fast cutting.

Optimised for battery-powered tools

Cutting discs with a special bond, developed for battery-powered and low-powered tools, to deliver full performance.

For full control

Flap discs become transparent during grinding and therefore allow the user to check the workpiece visually at all times.

With protection against ageing

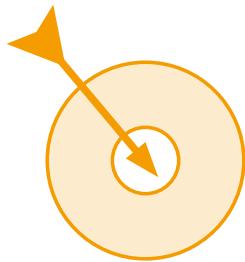

A special formula protects the bond of the disc against moisture. This significantly reduces the loss of performance from storage.

SERVICE+

- By the unique knowledge of grinding tools we have built up over decades
- For even better products and for your grinding tool product range

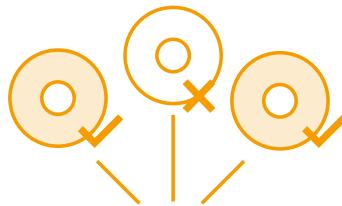

YOUR PRODUCT IS OUR PROJECT

1.

Define goals

Application, sales market, price range, only selected items or a full range across multiple quality lines, we provide the support you need for target group analysis and positioning.

2.

Product selection

Product type, quality level, diameter, thickness, shape and grain size can be selected with many variants. Choose products that fit perfectly into your portfolio.

3.

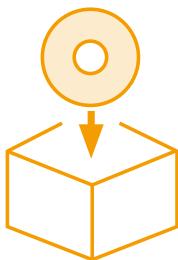

Create the disc label

We work with you to plan the disc label – for example, with an informative colour coding system or technology symbols that underline the quality of the product.

We support you at all steps of your project and make sure that your project is implemented quickly and without wasting resources.

You can rely on our private label team.

4.

Packaging

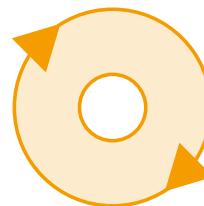

Metal boxes, shrink film, cardboard can be selected in every common conceivable and required size of packaging – entirely as a neutral design and only with your label, or depending on the amount that the packaging fits completely to your CI. The choice is yours.

5.

Offer

Depending on the product quality you have selected, the order quantity and the required delivery conditions, we prepare a competitive offer specifically for you.

6.

Full support

You benefit from a high level delivery reliability, excellent logistics, customs formalities handled by RHODIUS and our training courses for sellers and users.

RHODIUS OFFERS THE ENTIRE PRODUCT RANGE IN SECURED QUALITY

EXTRA-THIN CUTTING DISCS*

Disc diameter: 30 - 230 mm (1 1/4" - 9")
 Disc thickness: 0,6 - 1,9 mm (.024" - 5/64")
 Holes: 6,00 - 22,23 mm (1/4" - 7/8")
 Material suitability: stainless steel, steel, non-ferrous metals, stone
 Form: straight, depressed

FREEHAND CUTTING DISCS*

Disc diameter: 100 - 350 mm (4" - 14")
 Disc thickness: 2,0 - 4,0 mm (5/64" - 5/32")
 Holes: 16,00 - 25,40 mm (5/8" - 1")
 Materialeignung: stainless steel, steel, non-ferrous metals, stone
 Form: straight, depressed

STATIONARY CUTTING DISCS*

Disc diameter: 300 - 400 mm (12" - 16")
 Disc thickness: 2,5 - 4,0 mm (3/32" - 5/32")
 Holes: 22,23 - 40,00 mm (7/8" - 1 37/64")
 Material suitability: stainless steel, steel
 Form: straight

GRINDING DISCS*

Disc diameter: 76 - 230 mm (3" - 9")
 Disc thickness: 4,0 - 10,0 mm (5/32" - 3/8")
 Holes: 10,00 - 22,23 mm (3/8" - 7/8")
 Material suitability: stainless steel, steel, non-ferrous metals, cast iron, stone
 Form: depressed

*Product specifications only within standard commercial dimensions

Product range
for your private label

FLAP DISCS*

Disc diameter:	51 - 180 mm (2" - 7")
Holes:	16,00 - 22,23 mm (5/8" - 7/8")
Grain size:	24 - 120
Grain type:	aluminium oxide, zirconium, ceramic
Material suitability:	stainless steel, steel, non-ferrous metals
Form:	straight, depressed

FLAP DISCS WITH CUT-OUTS*

Disc diameter:	115 - 125 mm (4 1/2" - 5")
Holes:	22,23 mm (7/8")
Grain size:	40 - 120
Grain type:	zirconium, ceramic
Material suitability:	stainless steel, steel, non-ferrous metals
Form:	depressed

DIAMOND CUTTING DISCS*

Disc diameter:	100 - 600 mm (4" - 24")
Segment height:	3 - 17 mm (1/8" - 0,669")
Segment attachment:	laser-welded, sintered
Material suitability:	natural stone, concrete, asphalt, marble, tiles
Rim:	continuous, turbo, segmented
